MONOCHROME VARIABLE DATA PRINTING SOLUTION FOR
HIGH SPEED WEB INKJET PRINTING

E-Series Inkjet Carriage

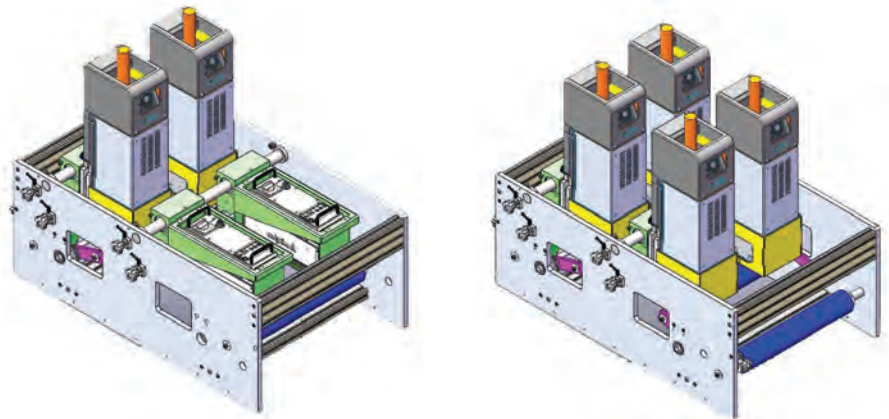

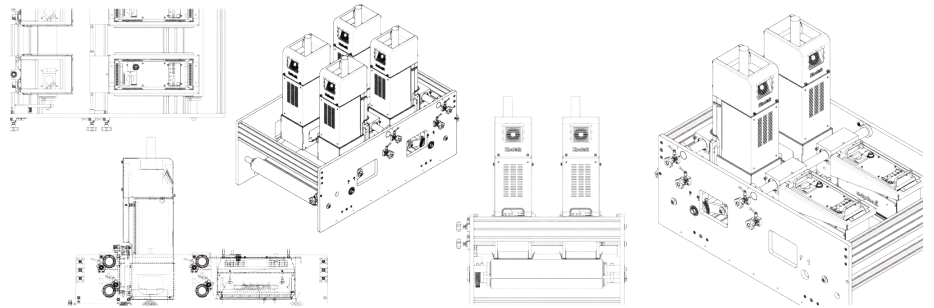

AN ECONOMICAL MOUNTING SOLUTION FOR THE KODAK PROSPER "S" SERIES INKJET HEADS

If you are looking for a simple solution to mount your Kodak S Series inkjet heads onto your web press, then our E-Series carriages might be your answer.

These well-built carriages can be equipped with Adphos M Series dryers to provide printing and drying in one modular unit. Portability from press to press is greatly simplified. The carriage can be mounted on top of existing finishing units or a base frame can be provided by GSS.

They are available in 20" and 26" wide web widths. Wider carriage options are available using our traditional TDC series of inkjet towers.

GSS and Adphos have more experience integrating Kodak inkjet heads than all other companies combined. Working in conjunction with Kodak, GSS designed the Prosper 6000 web transport which utilizes the Adphos NIR drying technology.
